

EasyIQ Employees

Identity management of employees.

EasyIQ Employees is a pendant to EasyIQ Basic, as it contains many of the same basic functions, only with data about the institution's employees. With EasyIQ Employees, data concerning the employees can be retrieved into the EasyIQ-database from almost any data source and in most formats.

The basic idea behind EasyIQ is identity management – to manage all users' rights in MS Active Directory. EasyIQ Employees ensures automatic creation and maintenance of the institution's employees as well as automatic disabling. The Employee-module can of course be tailored the individual educational institution.

[EasyIQ]

Systemtech

EasyIQ is a module-based provisioning platform developed for the educational sector in close co-operation with educational institutions.

EasyIQ contains two basic modules and a number of submodules. In this way, the educational institution only needs to choose the modules that meet its specific needs.

System demands

- EasyIQ Basic
- EasyIQ Administration
- 2003 / 2008 AD structure
- SQL 2005
