

EasyIQ SMS

- news in time!

Send SMS messages to both students and employees with the latest news about cancelled classes, change of classroom and other reminders. SMS messages can be sent on an ad hoc basis or be planned ahead, e.g. with extra service announcements during exams. Furthermore, EasyIQ SMS can send out SMS messages to everyone in one go.

To make sure that all mobile numbers are always updated, the students and the employees can always update the mobile numbers themselves. By using the standard phonebook, the administration can also contribute to the maintenance of mobile numbers.

EasyIQ SMS sends out both SMS messages and e-mails. Employees and students that have signed-up for the SMS-service without having a mobile will of course still receive an e-mail. EasyIQ SMS ensures a high level of information and service.

Easy to send!

In practice, it is simple. Choose the receiver/s of the SMS message, choose either a standard text or create a text manually and then press send. The standard messages can be changed by the IT department and by employees assigned with the specific right.

Interested in EasyIQ SMS

[EasyIQ]

Systemtech

EasyIQ is a module-based provisioning platform developed for the educational sector in close co-operation with educational institutions.

EasyIQ contains two basic modules and a number of submodules. In this way, the educational institution only needs to choose the modules that meet its specific needs.
