

[EasyIQ]

Systemtech

A modul-based provisioning platform for educational institutions.

The main functions in EasyIQ are distribution and standardization of data, maintenance-free AD and not least identity management – all kept in a nice and user-friendly web interface.

The screenshot displays the EasyIQ web interface. At the top, there is a navigation bar with 'Home' and 'Functions' links, and a user profile for 'Administrator' with a 'Log out' option. The main content area is divided into several sections:

- EasyIQ . Your shortcuts:** Includes icons for 'Print', 'Create new users', 'Password', and 'Booking user'.
- EasyIQ . School information:** Displays 'Systemtech demo school', 'Godthåbsvej 89, Skanderborg', and 'sales@systemtech.com'.
- EasyIQ . Intro:** Features a large graphic with the text 'Provisioning platform', 'Flexible and secure user management', 'User-friendly structure', 'Maintenance-free AD', and 'Identity management'.
- EasyIQ . Tips and tricks:** A section titled 'EasyIQ General' with a message about language settings and a 'read more...' link.
- EasyIQ . News:** An empty section for news updates.
- EasyIQ . AD overview:** A summary section showing 'Active users: 552', 'Organization units: 5', and 'Groups: 13'.

Standard features

- Automatic creation of users, OU, email accounts, personal folders etc.
- Correct position in OU
- Creation of security group associations, e.g. classes or electives
- Creation of rights to users' home libraries and group drives
- Creation of websites for users (MS II server)
- Automatic disabling of users that are no longer associated with the institution
- Tools to clear-up e.g. home drive and email accounts
- Adaption to the specific needs of the individual educational institution
- Creation of a profile library for MS Terminal Server or Citrix Servers

EasyIQ – eliminating administration

EasyIQ is a strong tool for solving the many different tasks an educational institution meets every day. Behind EasyIQ lies an engine which automatically creates users in the AD with regular maintenance, based on information from one or more administrative source.

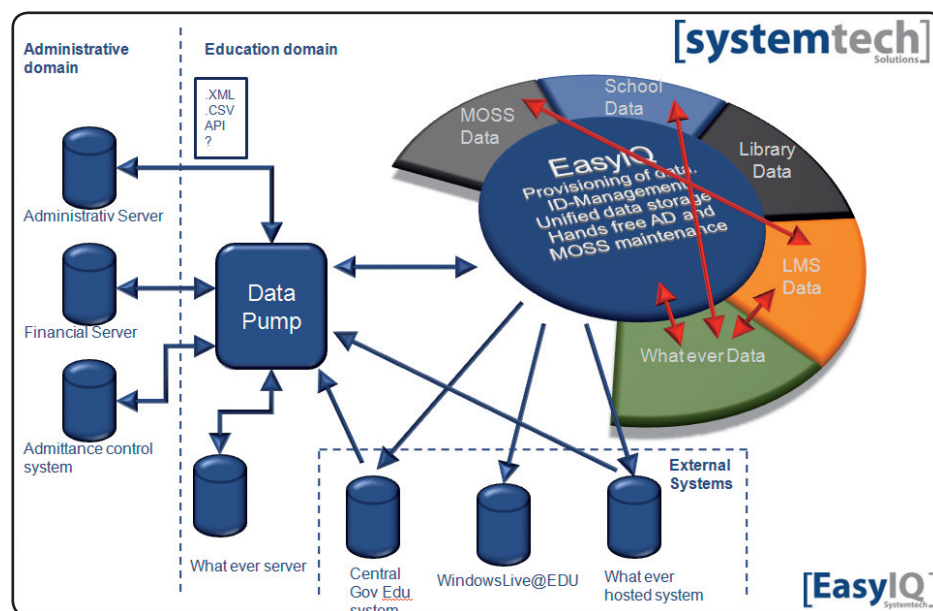

With EasyIQ's module-based structure, it is possible to build a solution that is tailored to meet an institution's specific needs. The different modules can be used by teachers, the IT department and the administrative personnel and furthermore, the specific tools can be assigned to individual employees in need of the exact function.

Thus, functionality as well as user-friendliness is in focus in EasyIQ.

EasyIQ - a provisioning platform

Being a provisioning platform, EasyIQ offers unique possibilities in relation to distribution of data and data sharing among different systems and departments at the educational institution. The model below indicates how EasyIQ as a provisioning platform forms the basis of the entire infrastructure of the educational institution by distributing data to different administrative systems and databases.

EasyIQ is based on MS SQL 2005 which makes it possible to lead data into the EasyIQ database from practically any data source and send and receive most formats. Consequently, EasyIQ provides internal as well as external parties, e.g. the school library system, the intranet, timetable programs, admittance control systems, print management solutions etc., with the possibility to receive and deliver data about all students and systems – easy and fast.

Identity management

The idea behind EasyIQ is based on identity management – to control the rights of all users in MS Active Directory. With EasyIQ as a provisioning platform, an educational institution is able to allow all users and supplier to base all security on AD-login, since EasyIQ automatically controls all rights. In other words, with this structure, security is even higher in order to prevent data from falling into the wrong hands and to provide the opportunity to offer single sign on to the users.

Interested in EasyIQ?

For further information on Systemtech or a non-committal demonstration of EasyIQ and the many different modules, please contact Systemtech on sales@systemtech.com or +45 70 30 00 00.
