

EasyIQ Exchange

Simple Schedule update!

EasyIQ Exchange facilitates the task to keep schedules updated, as EasyIQ Exchange transfers schedule blocks (skemabrikker) from the administrative system or a third party schedule programme (skemaprogram) to Exchange. Systemtech offers you two different solutions:

Solution 1

Every night, EasyIQ Exchange removes all of its own schedule blocks and recreates them. This way, EasyIQ Exchange does not interfere with other agreements in Exchange.

Solution 2

Solution 2 functions the same way as solution 1, however, higher performance allows solution 2 to only transfer the changes of the schedule blocks. Furthermore, the solution comes with a license for two Exchange servers.

Both solutions draw schedule blocks from both teachers and students.

Technical information

The schedule blocks are drawn as text files from EASY, SIS and Tabulex schedule within a fixed time frame. Via FTP, the schedule blocks are sent to the education domain, where the text files are sorted and are generated into an xml file and thereupon transferred to EasyIQ Exchange.
